

Who we are

COVID-19 Resources Canada is a grassroots initiative, started in March 2020 with the objective of facilitating Canada's response to the COVID-19 pandemic.

We are a dedicated team of multidisciplinary Canadians with expertise ranging from biomedical research to web development and business analysis, virtually working together to advance our mission.

Our Mission

Our mission is to use digital tools and the power of crowdsourcing to rapidly mobilize highly skilled personnel across Canada's diverse healthcare, research, policy, industry, and partner communities to address multiple aspects of the COVID-19 pandemic.

Our Goals

- To serve as a reliable source of information and expertise for COVID-19 research in Canada.
- To support & facilitate coordination of Canadian COVID-19 research efforts.
- To support COVID-19 capacity-building in public health, research, anti-misinformation and grassroots initiatives.

Our Core Team and Volunteer Regional Leads

COVID-19 Resources Canada was co-founded in March 2020 by Dr. Guillaume Bourque, PhD of McGill University and Dr. Tara Moriarty, PhD of the University of Toronto.

Our team of scientists, business analysts, web developers, academics, and professionals seen below works to empower our multidisciplinary network of experts and volunteers.

COVID Discussions is a virtual kitchen table discussion series, where YOU, the public and experts come together to chat about everything COVID-19 related.

Our aim is to provide a safe space for everyone to bring their questions about the science and social aspects of the COVID-19 pandemic.

#ScienceExplained is a collaborative science communication initiative.

With the help of multidisciplinary experts we provide the Canadian public with accurate written and video information about various aspects of the pandemic.
